# Cybersecurity **Maturity Level** Assessment

"Gain clarity on your cybersecurity maturity, address critical risks, and achieve peace of mind with a prioritized action plan from you expert assessment."

1. **Assessment and Discovery:** We begin with interviews, documentation review, and analysis of your existing cybersecurity practices across key domains.
2. **Maturity Scoring:** Using frameworks like CIS Controls and C2M2, we assess your organization's maturity level, identifying strengths and areas for improvement.
3. **Risk Identification:** We pinpoint vulnerabilities and potential risks that could impact your security posture.
4. **Prioritization and Roadmap:** Based on findings, we provide a prioritized cybersecurity roadmap with actionable recommendations to enhance your defenses and achieve targeted maturity goals.

This approach ensures that your organization can effectively manage risks and strategically improve cybersecurity maturity.

Cybersecurity Awareness Program

"Our Cybersecurity Awareness Program empowers employees to become your strongest line of defense."

Stage 1 AWARE: Simulate the most sophisticated attacks
Prepare employees for real-world threats by exposing them to simulated attacks that mirror the techniques used by actual scammers.

Stage 2 ENGAGE: Deliver Security Awareness Training Aligned with NIST Guidelines
Engage employees in continuous cybersecurity education, tailored to their roles and responsibilities.

Stage 3 ADOPT: Analyze Employee Risk Scores and Learning Outcomes
Foster better cybersecurity habits by monitoring and analyzing employee behavior and training results.

Stage 4 ACTIVE: Report Simulated and in-the-Wild Phishing E-Mails
Encourage active participation in threa detection and incident response by enabling easy reporting of suspicious E-Mails.
